

PHENOL ACID PEEL AFTER CARE

DAY OF PROCEDURE

- * Keep treated area covered with EltaMD Laser Balm.
- * Mist with Avene Thermal Spring Water over treated area to keep skin cool.
- * Re-apply EltaMD Laser Balm as many times as needed throughout the day to keep treated area moist.
(Do not allow the treated area to dry up.)

DAY AFTER ACID PROCEDURE

1. Remove old Laser Balm with vinegar and water mixture, by splashing and blotting treated area. (Vinegar and water recipe below.)
2. Rinse face with vinegar and water mixture and blot dry.
3. Spritz with Avene Thermal Spring Water to moisten wound.
4. Re-apply fresh coat of Neova CU3 Tissue Repair over wound.
5. Repeat 4 to 6 times a day.
6. For overnight, apply the EltaMD Laser Balm.

DAY 2 AFTER ACID PROCEDURE

1. Cleanse off Laser Balm with Hymed Gentle Cleanser and rinse with tap water.
2. Spray on Avene Thermal Spring Water and pat/press water into skin to moisten wound.
3. Apply a fresh coat of CU3Tissue Repair cream on wound.
4. Repeat 3 to 5 times a day...to keep skin pliable.

DAY 3 AFTER ACID PROCEDURE

Peeling Begins:

1. Cleanse off CU3 with Hymed Gentle Cleanser and rinse with tap water.
2. Fill Bowl with the vinegar & distilled water, splash and pat off sloughing skin.
The more you splash and pat, the more skin will loosen. (DO NOT FORCE OFF SKIN)
3. Spray on Avene Thermal Spring Water and pat/press into skin.
4. Apply fresh coat of CU3 Tissue Repair.
5. Repeat 4 to 6 times a day to keep wound moist.

MIXTURE: Mix Distilled WHITE Vinegar = 1 TEASPOON (Not more) Into Distilled Water = 2 CUPS
